Doors & windows are exposed to heat, moisture, dust, & constant wear & Tear over the years. The problem isn't the door or window. It's the frame behind it.

Wooden frames can warp, attract termites, & demand frequent maintenance. GI frames improved the category but remain vulnerable to corrosion & durability issues.

Jindal Stainless Steel Door & Window Frames are built to change that.

Get superior strength, premium aesthetics, & long-term reliability in one modern solution.

| FEATURE | STAINLESS STEEL | WOOD | GALVANISED STEEL |
|-----------------------|-----------------|-----------------|------------------------------|
| Corrosion Resistance | High | NA | Moderate / Coating-dependent |
| Termite Resistance | High | Poor | High |
